Education:

BSc in Electrical & Electronic Engineering (Major in Computer Science),
University of Dhaka, Dhaka, Bangladesh (2017-2022)

Skills:

Front-end: CSS3, HTML5, JavaScript, Typescript, Tailwind CSS, React js, Next js, REST API, Firebase Authentication, BetterAuth, Axios, TanStack Query

Back-end: NodeJs, JWT, Express JS

Database: MongoDB

Tools: Git, Firebase

Projects:

1. Soft Skill Mastery

([Live Site](#) | GitHub: [Repository](#))

An AI-powered learning application designed to help professionals develop interpersonal and leadership skills through automated course creation, interactive discovery, and direct AI assistance.

Technologies Used: Next.js 16, React, Google Gemini API, MongoDB Atlas, Better Auth, TanStack React Query, Tailwind CSS, Lucide React

- **AI-Driven Features:** Integrated Google Gemini 1.5 Flash API to enable automated course syllabus generation for administrators and a persistent conversational support assistant for learners.
- **Authentication & Role Access:** Configured Better Auth supporting Google OAuth, email/password authentication, and dedicated demo role views (Learner and Admin) for frictionless onboarding.
- **Course Exploration & Performance:** Built a course discovery portal featuring dynamic search filtering, category tabs, price sliders, custom pagination, and asynchronous state management via TanStack React Query.
- **Admin Catalog Control:** Created an administrative management suite enabling full CRUD operations for course catalogs, enriched with automated AI metadata completion.
- **Interactive UI & Custom Micro-interactions:** Designed a modern, glassmorphism-themed dark mode interface complete with a custom React Context toast notification system and interactive course enrollment checkout flows.

2. Wisdomio

([Live Site](#) | GitHub: [Client Side](#), [Server Side](#))

A full-stack community platform designed for sharing meaningful life lessons, discovering personal growth insights, and engaging through interactive content.

Technologies Used: Next.js 16, React, Node.js, Express.js, MongoDB, Better Auth, Stripe, Tailwind CSS, HeroUI, Recharts

- **Monetization & Payment System:** Integrated Stripe Checkout and Webhook verification to handle secure premium membership upgrades and unlock gated content.
- **Role-Based Access Control:** Built role-based authentication using Better Auth, restricting premium features and administrative management tools to authorized roles.
- **Admin & Analytics Dashboard:** Developed a comprehensive admin dashboard with Recharts to visualize user growth, track lesson metrics, and manage community moderation (reports, user roles, featured posts).
- **Interactive Community Engagement:** Implemented full CRUD features for post creation, along with real-time interactive capabilities such as liking, bookmarking, commenting, and flag/reporting mechanisms.
- **Data Aggregation & UI:** Optimized MongoDB aggregation pipelines for performant querying of top contributors and overall statistics, served through a clean, responsive interface powered by HeroUI.

3. Pawfect match

([Live Site](#) | GitHub: [Client Side](#), [Server Side](#))

A full-stack pet adoption web application where users can list pets for adoption, browse available pets, and send adoption requests.

Technologies Used: Next.js, React, Node.js, Express.js, MongoDB, Tailwind CSS, DaisyUI, NextAuth.js, REST API

- **Full-Stack Development:** Engineered a responsive pet adoption platform connecting pet owners and adopters with complete CRUD capabilities for pet listings.
- **Adoption Management System:** Built a real-time request workflow allowing owners to review, approve, or reject incoming adoption requests via modal interfaces.
- **Authentication & Authorization:** Implemented secure user authentication to restrict listing management and private request views strictly to resource owners.
- **UI/UX Optimization:** Designed a modern, fully responsive interface using Tailwind CSS and DaisyUI with interactive toast notifications for user actions.
